Introduction

Microspot USA Inc.'s Symbol Libraries Volume 5 provide you with many of the elements you need to quickly and easily complete or embellish your MacDraft® drawings. Each symbol has been professionally drawn, using vectors rather than bitmaps, to allow for high quality printing of your drawings. The City & Road Symbol Libraries have been saved as bitmap and vector.

To use the library symbols, simply copy and paste them into your drawings. You can also copy and paste or drag and drop them from the Microspot Media Assistant Catalogs.

You can rotate, flip, move, or resize any symbol once you paste it into a drawing. If you ungroup a symbol, you can remove, resize, fill or otherwise edit any object within it. You can also ungroup symbols that contain text and add your own text. (Please refer to your MacDraft User Guide for information about editing and modifying objects).

Computers, contains over 40 images of Macintosh® computers, PC computers, external devices, monitors, network devices, printers, scanners and computers accessories.

City & Road, includes more than 40 city signs and lights for creating professional-looking design and adding character to your presentations.

Landscape, offers 40 landscape elements separated in Perspective and Top View, including in each one Branched Trees, Bush, Coniferous, Foliage, Palms, Tree Groups and Tropical Plants. This chapter provides a large quantity of symbols for architects and designers.

Stars and Shape bursts, has over 20 symbols for creating professional presentation and embellishing your design.

Signs to write on, contains 19 signs to write on, adding character to your presentation.

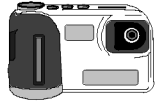

Maps, this chapter includes the world wide map and one map per each continent.

Furniture / Installations, includes more than 50 images separated in Banks, Bathroom, Commercial Offices and medical.

NOTE: These symbols have been optimized for printing on Epson® Stylus 900 Inkjet printer, LaserWriters® and other Post-Script® output devices. Printing to other devices, such as inkjet printers, may reduce clarity in the final image.
