Introduction

Microspot offers four series of Microspot Librarian symbol libraries. These are sets of graphic images ready for use in MacDraft® drawings and will provide you with many of the elements you need to quickly and easily complete or embellish your drawings.

Librarian

Librarian is a drag and drop-compatible application for storing and retrieving any type of data, and is included with MacDraft 4.3. It can be used with any application that supports drag and drop (or copy and paste). An unlimited number of libraries can be created, each of which can hold hundreds of items. Custom libraries can contain symbols from different symbol libraries, items and files you have drawn, and files of many other types.

Librarian can be used with MacDraft to hold PICT images of furniture, architectural and electrical components etc. Adding library items to drawings is as simple as dragging and dropping them from the library into the MacDraft document.

See the section Librarian in the MacDraft User Guide Addendum for further details.

Drag and Drop

MacDraft version 4.3 implements drag and drop. This means that any PICT file can be dragged into a MacDraft document window, and objects or group of objects can be dragged from a MacDraft document to, for example, a Librarian file (symbol libraries in the old format are not supported).

Items in image and graphics file formats dragged into MacDraft from Librarian files will be converted into PICT.

See the section Drag And Drop in the MacDraft User Guide Addendum for further details.

About Symbol Libraries

Each library has been professionally drawn, using vectors rather than bitmaps, providing you with the highest possible quality of printing.

Note: The symbols have been optimized for printing on the LaserWriter® and other PostScript® output devices. Other devices, such as inkjet printers, may reduce clarity in the final image.

Editing Symbols

Symbols can be easily edited to suit your own needs:

- Once dropped into a drawing, a symbol can be rotated, flipped, moved, or resized.
- If you ungroup a symbol, you can remove, resize, fill, or otherwise edit any object within it.
- You can ungroup symbols that contain text and substitute your own text.
Note: be careful when resizing symbols that contain text.
